

Pre-Treatment Instructions for Laser Hair Removal

No waxing, plucking, bleaching, threading, or chemical depilatories for at least 6 weeks prior to first hair removal treatment or in between treatments.

Please let us know if you have a history of any of the following:

Local or recurrent skin infection

Pregnancy (including IVF)

Herpes simplex 1 (perioral) or 2 (genital)

Keloids/hypertrophic scarring

Isotretinoin (Accutane) presently or in the last 12 months

Epilepsy/Seizures

Vitiligo or Psoriasis

Previous laser hair removal treatments

Suntan or exposure to tanning bed in the previous 4 weeks

Tattoos or nevi in treatment areas

Any chronic medical conditions

Skin to be treated should be shaved and free of any topical products on day of procedure
